CATALOG No. 25

SPRING 1925

NOTICE: All prices quoted in this Catalog are subject to change without notice, and subject to stocks being unsold when your order is received, and unless otherwise specified FOB Sherman, Texas.

In case prices advance, goods will be billed to you at prices prevailing at the time the order is received. Should prices decline we will bill your order and send you the balance due you on the order. If you desire to limit us to prices so state in your order.

IMPORTANT: No reliable seed breeder or dealer can guarantee seed results, so we give no warranty, expressed or implied, as to purity, description or productiveness, or any other matter of any seeds or plants we may send out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned to us immediately and we will refund any money paid on them.

GUARANTEE: We do guarantee our seed to be just as represented to you in appearance, and after you receive seed from us, examine them and if you are not satisfied return them to us and we will refund any money paid on them, plus the freight both ways. You are to be the sole jury and judge. You have ten days after receipt of seeds to make your examination, germination tests, etc. After that length of time we will take it for granted you are satisfied, unless we hear from you to the contrary. Our seeds are sold on a guarantee of "SATISFACTORY SEEDS OR MONEY BACK." No questions asked or any red tape to go through. If not satisfied, just return the seed and any money paid will be promptly refunded, also transportation charges. Isn't that fair?

As some freight and express shipments are delayed in transit we will be glad to help you locate them if you will notify us. This service is free to you and we want you to avail yourself of it.

If you do not want to send a full remittance covering your order, send one-fourth the amount of same and we will send you the shipment COD for the balance.

Ask us for special delivered prices on large lots of seeds, we will be glad to give them to you.

Sincerely yours,
SHERMAN SEED COMPANY

Sherman Seed Co.

JAN 12 1925

BEANS

GREEN POD BUSH

Bountiful: Of thrifty growth and very hardy. The stringless and tender flat green pods are produced very early in the season and the bushes continue to bear for a long time. The pods remain in good condition for quite some time. Extensively grown for market.

Burpee Stringless: This is one of the finest green pod beans grown. The plants are medium large and of strictly bush-form. The pods are medium in length and slightly curved. The pods when full grown are meaty and juicy, lacking the faintest signs of strings. Very early and hardy.

Refugee or 1000 to 1: The pods are fleshy and remarkably solid. Brittle in texture and mild in flavor, but with light strings. Somewhat later than other Green Pod varieties but very productive.

Extra Early Refugee: Similar to the Refugee or 1000 to 1 but much earlier. Pods are slightly stringy, but brittle and tender.

Red Valentine: The plants are dwarf, hardy and early maturing. The pods are sharp pointed, round and very fleshy, being deeply saddle-backed and brittle even when fully grown. Extensively grown by market gardeners.

Full Measure: The plant is of perfect bush type, branching freely and bearing an immense crop of pods. The pods are strictly stringless, measure nearly six inches in length and a deep green color. The plants are hardy and medium early. We recommend this variety highly to our friends.

Tennessee Green Pod: A hardy plant of true bush type. Very large pods during mid season. The pods are flat, almost seven inches long and a dark green color. A tremendous cropper, but the pods are stringy and not very brittle.

Long Yellow Six Weeks: An old standard variety, very hardy, productive and early. Pods nearly six inches long, flat and light green in color. Slightly stringy and of medium quality.

Black Valentine: Very popular on account of its blight-resisting quality. Matures early, producing long straight pods.

Free Flower Seed With Every Seed Order.

Giant Stringless Green Pod: The plants are of strong growth, making large, compact bushes and bear a fine crop of pods. The pods are meaty, brittle and stringless at all stages. A fine midseason variety for home or market. We recommend this variety to our customers.

PRICES on above: Small pkt. 5c, large pkt. 10c, ½ lb. 20c, lb. 35c, 2 lbs. 65c postpaid.

DWARF WAX POD

Currie's Rust Proof: A very early and productive variety. Pods large and flat. Very uniform and extremely straight. Pods stringy and of fair quality. Grown by market gardeners because of its earliness and hardness.

Davis Kidney Wax: An early productive and attractive variety. Pods large and flat. Stringy and fibrous and of fair quality.

Black Wax: Of true bush growth, and extremely productive. Pods light golden yellow, flesh brittle and stringless; of fine flavor.

Golden Wax: Of typical bush growth, ten to twelve inches high, producing a good crop of straight pods. Stringless, brittle, of lemon-yellow color, slightly tinged with green.

Wardwell Kidney Wax: Robust in growth and most prolific, with long flat pods of rich lemon-yellow. The pods are remarkable for their meatiness, fine flavor, brittleness and practical freedom from strings. Very early and a market gardener's favorite.

Webber Wax: A high quality, flat podded, stringless variety of the season of Wardwells. Pod broad and bright yellow. Plants very vigorous and productive.

Sure Crop Wax: A most prolific cropper of superlative quality. Pods rich yellow and slightly curved, very meaty and sweet and perfectly stringless at all stages. Many gardeners prefer this variety to all others in existence. We highly recommend it.

PRICES on above: Small pkt. 5c, large pkt. 10c, ½ lb. 20c, lb. 35c, 2lbs. 65c, postpaid.

DWARF BUSH LIMA

Fordhook Bush Lima: The plants average twenty to thirty inches in height. The bushes are strong and erect, withstanding high winds and rains. The foliage is heavy and the leaves are broad and very dark green in color. The pods are borne in "clusters" of from four to eight pods. The pods measure from four to five and one-half inches long and contain from four to five magnificent large beans. The beans mature very early. We recommend this bean for truckers and home gardeners.

Free Flower Seed With Every Seed Order.

Speckled Bush Lima: A vigorous lima that is planted extensively in the South. It stands more dry weather than any other bean and for that reason is planted for late summer use. Known also as the Grandma Butter. Very hardy and prolific.

Henderson Bush Lima: An extra early exceedingly prolific Lima of true bush form. Both pods and beans are quite small but of excellent quality. Pods about three inches long and contain from three to four beans each.

PRICES on above: Small pkt. 5c, large pkt. 10c, ½ lb. 25c, lb. 40c, 2 lbs. 75c, postpaid.

POLE OR RUNNING

Kentucky Wonder, or Old Homestead: An early and productive variety that climbs well and bears a fine crop of large pods. The pods measure from seven to nine inches and are slightly curved. They are thick, meaty, tender, brittle and of good quality, showing light strings as the pods reach full size.

Kentucky Wonder Wax: A productive variety bearing a fine crop of long, thick and almost straight pods of a very light yellow color. Brittle, thick, meaty, and of excellent quality.

Kentucky Wonder, White Seed: A very early white seeded variety. Pods six to seven inches long, round and nearly straight. Very tender, meaty and stringless.

Burger's Stringless Green Pod: Pods uniform, straight, six to eight inches long, of a rich green color and very meaty; entirely stringless. The beans are pure white and fine for winter use. Excellent quality.

Lazy Wife: The green pods measure from five to six inches in length. They are broad and stringless. Each pod contains from six to eight round white beans. Vine makes a strong growth and bears abundantly.

King of the Garden Lima: A strong grower and uniformly large podded. The pods contain from five to six large beans. These beans are of excellent quality, easily shelled, of large size and of handsome appearance. Medium early.

Speckled Pole Lima: Plants are vigorous and hardy. Stands dry weather well and bears until frost. Very productive.

Carolina, or Sieva: Known as the "Butter Bean" of the South. It is very early, hardy and productive. The vines grow quickly and are slender in size. The dried beans are small and used extensively for winter use.

PRICES on above: Small pkt. 5c, large pkt. 10c, ½ lb. 25c, lb. 40c, 2 lbs. 75c, postpaid.

Free Flower Seed With Every Seed Order.

Crosby Egyptian: This variety is extensively grown by market gardeners. The skin is smooth, of dark red color. The roots are almost round, with a small tap root, and a very small crown of leaves. The flesh of the beets is a deep blood red, with slightly lighter zonings. The texture is crisp but free from any tough fiber.

Detroit Dark Red: The roots are globular, and the skin is blood-red and the flesh dark red zoned with a lighter shade. The flesh is crisp and tender.

Early Blood Turnip: The old standard table Beet. The roots are nearly round or slightly flattened, the flesh is bright red, zoned and of good quality, not so early as Detroit and has a larger coarser top.

Dewing's Blood Turnip: A second early dark, blood turnip-shaped variety with a medium sized top. It is grown quite extensively for a pit beet to sell through the winter and is a good keeper.

Early Eclipse: Earlier than Early Blood Turnip, roots nearly globular, flesh bright red, zoned with pinkish white. Medium sized tops.

Long Smooth Blood: The roots are very long, almost cylindric, twelve inches long and $1\frac{1}{2}$ inches in diameter. The skin is smooth and uniform, dark red in color. The flesh is blackish red. This beet requires deep, well dug and well manured soil. A fine winter keeper.

Swiss Chard: The yellowish-green leaves are used as greens and the thick middle rib may be cooked as a separate dish and served creamed with butter and a little vinegar.

PRICES on above: Small pkt. 5c, large pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 25c, lb. 70c, postpaid.

CABBAGE

Early Jersey Wakefield: The heads are uniformly hard and solid. They are conical in form, generally pointed at the end with but few outside leaves. The heart is solid and well blanched. Earliest variety.

Charleston, or Large Wakefield: Produces larger heads than the Early Jersey Wakefield, but is a week or two later in maturity. The heads are large and solid. A heavy yielder, of fine quality. Especially adapted to the South.

Free Flower Seed With Every Seed Order.

Early Flat Dutch: A well known strain, popular for the summer; in our opinion it is not quite as good as All Seasons. Good for Sauer-Kraut.

Premium Late Flat Dutch: Makes a large and much flattened head of remarkable solidity. The outer leaves are small and round. Excellent for shipping or winter storing.

All Seasons: The heads are extremely hard and solid; round, flattened on the top and ready for market earlier than any large Cabbage. Good for winter or early summer.

Drumhead: This is uniform in heading and dwarf in growth. It grows with little outer foliage, the leaves all folding in closely about the large solid head. An excellent variety for late fall and winter.

Danish Ballhead: This seed is grown in Denmark and imported by us. The most popular Cabbage for winter. It is esteemed for winter use because of the great solidity and keeping qualities. The heads are round, very hard and solid; they keep in finest condition through the winter.

Surehead: A popular strain of the favorite Dutch type. The heads are very large, round, flattened at the top, remarkably uniform; extra hard, fine in texture and weigh ten to fifteen pounds each. An excellent shipping variety and good keeper.

Copenhagen Market: The heads are round in form, averaging about eight pounds in weight, very solid, with small core of good quality. The plants are short stemmed, the heads being produced almost on the ground. The leaves are light green, rather small and saucer-shaped and always tightly folded. It is ready for market as early as Early Jersey Wakefield, and the heads being larger, give a heavier yield per acre, than that variety.

Succession: A popular second early variety. Heads are very large and somewhat flat.

Chinese, or Celery Cabbage—(Pe-Tsai): A well known variety with large leaves of a light green color, and thick pure white, tender stalks and heart. This cabbage is more tender than ordinary cabbage.

PRICES on above: Large pkt. 10c, oz. 20c, ¼lb. 70c, lb. \$2.50, postpaid.

Oxheart: The first edible roots measure three-fourth inches across, fully grown roots measure two

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

and one-half inches in diameter. They are free from hard core of fiber, and are sweet and tender. This is a fine carrot for home or market, due to its fine appearance and quality. They are sweetest when still small.

Danver Half Long: This has proven to be the most popular variety in America. It is planted on a large scale by market gardeners as there is a sale for it everywhere. The roots are uniform in shape and size. They usually measure five to six inches in length. The flesh is a rich orange color throughout, with a large well defined core. The texture of the roots is fine grained and free from woody fiber. The flavor is remarkably sweet.

PRICES on above: Large pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 80c, postpaid.

CAULIFLOWER

Early Snowball: Many market gardeners claim for Early Snowball first place for both early and late planting. It is a popular extra early variety of dwarf compact growth. Under favorable conditions nearly every plant will make a fine solid head of good size. The heads are pure white, with very close compact curd of excellent quality.

PRICE on above: Pkt. 15c, $\frac{1}{4}$ oz. 50c, oz. \$1.50, $\frac{1}{4}$ lb. \$5.50, lb. \$20.00, postpaid.

CANTALOUPE

Netted Gem, or Rocky Ford: This is the most popular and finest of all green fleshed melons. The vines are of sturdy, healthy growth comparatively short, and branch freely. They set a large number of fruit close to the hill. The melons are even and regular in form, nearly round or slightly oval. The skin is green, turning to a peculiar gray color when fit for shipping. The melons have a small seed cavity, and the portion of flesh immediately surrounding it is tinged with a golden color. The flesh is green and so sweet and luscious that it may be eaten close to the rind. The melons weigh about one and one-half pound and are firm and solid. Excellent shipper.

Burrell Gem: The fruits are six to seven inches long, rather sharply sloping at the ends. Well ribbed and covered with a grayish netting. The skin is rich dark green, the flesh salmon-pink and sweet. The flesh is thick and firm, ripening close to the rind.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Banana Muskmelon: Long fruits having a banana like aroma. The fruits are from fifteen to twenty inches long. The salmon flesh is thick and delicious in flavor. An excellent home garden variety.

Texas Cannon-Ball: It is very desirable for home use and nearby markets in all sections of the South. Medium in maturity and size and round of shape. Its flavor is delicious and the dense netting makes it almost sun and insect proof. The seed cavity is small, and ripens close to the rind. Very prolific and hardy.

SALMON-TINT POLLOCK NO. 10-25: This is an early melon of the solid netted type that is so desirable. Very small seed cavity, with thick, luscious flesh of genuine salmon tint shading to green very near the rind. A splendid shipper and keeper. It is a prolific yielder and has been pronounced the best salmon tinted melon. Grown exclusively by the Cantaloupe growers in the Rocky Ford section.

HONEY DEW: Honey Dew requires a longer and warmer season than other melons. The fruits with smooth almost white rind measure six inches in diameter. The flesh is green and thick, having a peculiar flavor almost like honey. To have the melons in best condition, gather as soon as they slip from the vine and store in a cool dry place for two or three days, as they are at their best when a trifle over-ripe

PRICES on above—Large pkt. 10c, oz. 15c $\frac{1}{4}$ lb. 30c lb. 95c postpaid.

Honey Ball: This is the new sensation that everyone has been talking about. It is a cross between the Honey Dew and Texas Cannon Ball. The cross, while taking some of the characteristics of both parents, has many features distinct and superior to either. The melon is larger than the ordinary cantaloupe but not so large as the Honey Dew. The rind is slightly netted and almost round. The flesh is creamy yellow, with a green tinge and very thick and firm. The seed cavity is small and well filled. This melon should not be pulled until it will easily slip from the stem. It is better to store them in a cool dry place several days before eating. When fully ripe and mellow the thin outside rind can be peeled off like an orange and the whole of the meat eaten. This melon is a wonderful shipper and a premium is paid for the melons. Our seed is from the largest melons and not crop-run.

PRICES on above—small pkt. 10c, large pkt. 15c, oz. 25c, $\frac{1}{4}$ lb. 90c, lb. \$2.75, postpaid.

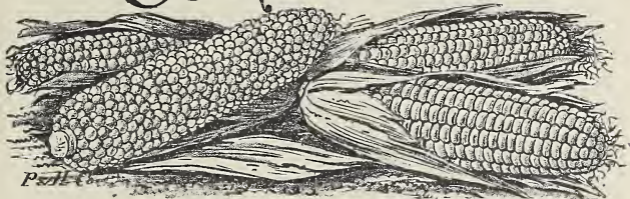

COLLARDS

Southern, or Georgia: Slightly resemble Cabbage in growth and are largely planted for winter greens. They have a Cabbage taste and will continue to grow all winter.

Free Flower Seed With Every Seed Order.

PRICES on above—large pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 90c postpaid.

CORN. : SWEET:

Early Adams: This is not a sweet corn and the distinction should be kept in mind by gardeners. Generally planted by market gardeners for early use. The ears are larger than sweet corn, and it matures about two weeks later than Extra Early Adams. Good flavor.

Extra Early Adams: This is not a sweet corn, but is planted for early use. Of good flavor and the ears are about six inches long.

Peep O'Day: The earliest true sweet corn. The stalks are $3\frac{1}{2}$ to 4 feet high. The ears are medium sized and the flavor is delicious.

Extra Early Cory White: One of the earliest and best of extra early sweet corn. Ears are from 7 to 8 inches long, sweet, tender and white, stalks are about four feet high, usually producing two large handsome ears on each stalk.

Golden Bantam: This is the most famous sweet corn in the world. It is the richest and sweetest of all sweet corn. The stalks are dwarf and stocky. They grow from four to five feet high and usually carry two ears to each stalk. The ears are a handy size to be eaten from the cob, and the kernels are broad and deep. Noted for its rich buttery flavor.

Black Mexican: A medium early variety, growing about six feet in height, ears are eight inches long, well filled with large, rather flat grains, which are a bluish purple of deliciously sweet flavor. Known for its sweetness and quality.

Stowell's Evergreen: A standard main crop variety. Ears of large size, long and well filled. Under good cultivation produces three large ears to the stalk. Stalks are large and strong, grains of good size, long and deep, cob small and slender. Especially adapted for all the South.

Country Gentlemen: A very productive variety, with large ears and irregularly arranged, slender deep grain. The ears are desirable in most localities as a market variety. Of very fine quality.

PRICES on above—Large pkt. 10c, $\frac{1}{2}$ lb. 15c, lb. 25c, 10 lbs. \$1.85 postpaid.

Free Flower Seed With Every Seed Order.

CUCUMBER

Arlington White Spine: The Cucumbers are very regular in outline, uniform in size, averaging seven to eight inches in length, straight and a dark green color. The flesh is white, crisp, and solid with very few seeds. Vines are vigorous and very productive. Extensively grown in some sections for market.

London or Improved Long Green: The young Cucumbers make very fine pickles. Under favorable conditions the dark green fruits grow ten to twelve inches in length. The skin is a deep rich green; flesh solid, crisp and of excellent quality.

Davis Perfect: This variety has gained much in favor during the past few years. The fruits measure from seven to nine inches in length and slightly taper at both ends. The skin is rich dark green and the flesh solid and of superb quality for slicing. Contains very few seeds. This is an all around Cucumber for home or market use. The vines are strong, healthy and very prolific.

Early Fortune: In some respects resembles the Davis Perfect. The vines grow vigorously and set fruit freely. The full grown fruits measure nine inches in length, slightly tapering at both ends. Skin is a rich dark green and does not fade when shipped. The flesh is thick and of an attractive pure white color. Has a small seed cavity and contains very few seeds. Grown for home and market use.

Japanese Climbing: The fruits measure from ten to twelve inches in length. Skin dark green color, turning to brown and netted when ripe. The flesh is pure white and crisp and of mild flavor. Vines can be trained to grow on fences, wire netting, etc.

Early Green Clusters: The fruits are of slender form and most desirable for pickling. They are very prolific and frequently set in clusters of two and three. If the fruits are kept gathered, the vine will continue to bear long. Of excellent quality, with crisp, juicy white flesh, meaty and small seed cavity.

Cool and Crisp: An extra early, prolific, dark green Cucumber with fruit of good length and fine quality. Fruits are pointed at both ends.

Klondike: The fruits are very regular in size and shape, extra early, very crisp and unsurpassed for slicing. It makes excellent pickles when young. Very hardy and prolific and a sure cropper. Will stay green for days after being picked.

Chicago Pickling, or Boston Pickling. The standard variety grown for pickling purposes. It can be used for slicing when fully matured, but is preeminently a pickling variety. Its small size, dark green color and immense productiveness making it a favorite for that purpose. Fruits are very uniform.

PRICES on above—Large pkt. 10c, oz. 15c, ¼ lb. 35c, lb. \$1.15 postpaid.

Free Flower Seed With Every Seed Order.

EGG PLANT

New York Improved Spineless: This is an entirely spineless strain of the large purple fruited type. Our strain is especially fine. The plants are most productive, bearing oblong fruits which are beautiful rich purple.

Black Beauty: The fruits grow to enormous size and are ready for use ten to fourteen days before any other variety. The plants grow in compact, yet robust bunches, which branch freely from the ground. The fruits are large and of the typical egg type. They have a rich purplish black skin and are entirely free from spines or thorns. An excellent variety.

PRICES on above—Large pkt. 10c, oz. 30c, ¼ lb. 95c, lb. \$3.50 postpaid.

—ENDIVE—

Green Curled, or Giant Fringed Oyster: The leaves are finely cut giving the plant a feathery effect. Rich green in color but blanching to a creamy white. Chiefly grown for fall and summer use. Fine salad plant and can be grown practically the entire year.

PRICES on above—Large pkt. 10c, oz. 15c, ¼ lb. 30c, lb. 95c Postpaid.

KALE

Dwarf Green Curled: This is a variety extensively grown for fall and spring use. It is low growing, compact, with finely curled leaves of a deep green. A productive variety.

PRICES on above: Large pkt. 10c, oz. 15c, ¼ lb. 30c, lb. 95c, postpaid.

·LETTUCE·

Big Boston: The heads measure from ten to twelve inches across, The color of the heart is a light golden yellow and the flavor is crisp, juicy and distinctly buttery. The heads have very few outer leaves and can be shipped long distances. This variety will please the most critical gardener, whether grown for market or home use.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Black Seeded Big Boston: Almost identical with the White Seeded Big Boston described above. In certain sections the Black Seeded variety is preferred by growers, who found under their conditions the heads are even more tightly folded. The heart is brittle, juicy and of a bright golden yellow color. Stands shipping well.

Hanson Improved: Large size heads and uniformly sure heading. The heart is solid and beautifully blanched. Crisp, mild and tender.

Black-Seeded Simpson: A standard variety making a thick bunch of crisp, light yellowish green leaves. The heads grow to enormous size but are loose and not tightly folded. Easily grown and of excellent quality.

Early Curled Simpson: This loose heading variety is one of the oldest and most widely known in America. The heads are large, light green and the leaves are much crumpled. Grows quickly and is hardy. It forms a tight bunch of leaves at the center of the plant which are of excellent quality. It does well in frames and open.

Prizehead Early: One of the best known and most popular of all varieties of lettuce. The plants are medium large, and are composed of many curly leaves. The foliage is bright green, shaded with light brown. It is one of the best home garden varieties, as it grows quickly and makes a lot of good eating leaves of remarkably good flavor. It is strictly non-heading, but makes a large and distinct bunch of leaves at the heart when mature.

PRICES on above: Large pkt. 10c, oz. 25c, ¼lb. 80c, lb. \$3.00 postpaid.

\$1.00 GARDEN COLLECTION No. 6

As some of our customers do not want to spend more than \$1.00 on a Garden we have prepared a Special Garden Collection which would retail for \$1.90 which we will send for \$1.00. Order this collection and have all the vegetables you can use for \$1.00 Consists of:—

½ lb. Stringless Green Pod Beans.....	20c
½ lb. Lazy Wife Pole Beans	25c
1 oz. Early Blood Turnip Beets	15c

TOTAL VALUE OF SEED \$1.90. ALL FOR 1.00

MANGEL WURZEL AND SUGAR BEETS

Mammoth Prize Long Red: This is the heaviest cropping and largest of all mangels. The roots grow from one-half to two-thirds above the ground and are frequently two feet or more in length by six inches in diameter. The skin is bright red, flesh white, with veined rings of rose-pink.

Golden Tankard: A smooth yellow fleshed mangel, yields large crops on good land and is easily harvested. The roots are heavy and solid, of a typical tankard shape. The flesh is firm and the roots are excellent keepers.

Giant Sludstrup: A long reddish yellow root growing more than half out of the ground, easily harvested and excels any other variety in weight and feeding value.

PRICES on above—Large pkt. 5c, ½ lb. 25c, lb. 45c, 10 lb. \$3.75 postpaid.

MUSTARD.

Southern Giant Curled: The true curled leaf variety that is so popular. Our stock of this variety is very fine and yields heavily.

Chinese Smooth Leaf: A very vigorous sort, leaves dark green, large and smooth and of sweetly pungent flavor.

PRICES on above—Large pkt. 10c, oz. 15c, ¼ lb. 40c, lb. \$1.25, postpaid.

OKRA

Dwarf Prolific: The plants make a dwarf and stocky growth. Matures early and yields a tremendous crop pods. They are fiberless when young.

White Velvet: A tall growing plant bearing a large crop of pods. They are long, smooth and round with an attractive velvet skin.

Perkins Long Pod: The plants grow 2½ and 3 feet in height, are close jointed, with ample foliage, and bear smooth white pods of the very finest quality at each leaf joint.

PRICES on above—Large pkt. 10c, ¼ lb. 20c, lb. 45c, 10 lbs. \$4.00 postpaid.

Free Flower Seed With Every Seed Order.

ONIONS

Southport White Globe: A perfectly round bulb and fine slender necks. The large bulbs have a paper white skin which gives them a very attractive appearance. The flesh is also pure white, sweet, juicy and of a delicious flavor.

PRICES on above—Pkt. 10c, oz. 20c, $\frac{1}{4}$ -lb. 75c, lb. \$2.75, postpaid. LL

Prizetaker: This is a most profitable variety, growing to an enormous size. The bulbs mature late. They are thin necked and have a bright straw yellow skin. The flesh is pure white, crisp, extremely sweet and mild in flavor. Because of their handsome appearance and fine quality they sell readily. A fine market variety.

PRICES on above: Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.40, 10 lbs. \$12.50 postpaid.

White Portugal or Silverskin: The bulbs grow to a good size, ripen early and quite evenly. The flesh is mild and sweet, the thin skin a clear silvery white. Of handsome appearance if the bulbs are gathered as soon as ripened and carefully dried under shelter, away from the strong sunlight.

PRICES on above: Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 75c, lb. \$2.75, postpaid.

Yellow Globe Danvers: This is an old favorite for winter use. The skin is a light golden brown or pale yellow, and the flesh is pure white, crisp and mild in flavor. The plants have slender necks and the bulbs keep well over winter. Although not so truly globe shaped as the Southport White Globe, they are somewhat earlier and are sold in the early markets, bringing a good price.

PRICES on above: Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 45c, lb. \$1.60, 10 lbs. \$14.50, postpaid.

Red Wethersfield: Though well flattened the bulbs are thick through. The outer skin is a deep rich purplish red, smooth and glossy; flesh white lightly tinged with pinkish rose. They are mild in flavor and are thin necked.

PRICES on above: Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.40 postpaid.

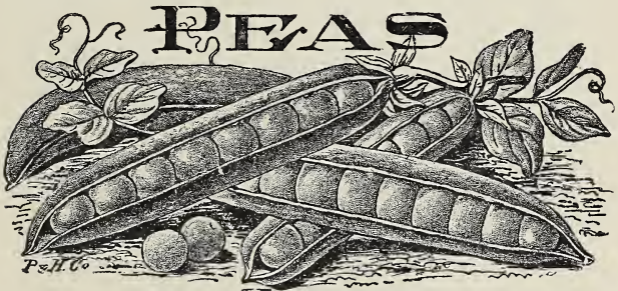

Free Flower Seed With Every Seed Order.

White or Yellow Bermuda: The most widely and largely planted of the Bermuda varieties. Before we introduced Crystal Wax, this variety was called white to distinguish it from the Red. The skin is a light straw color and the flesh is a pure white. This variety is a good keeper, mild, very sweet and grows as large as saucers in many sections. It usually brings a premium on the market as our seed is all imported from the Teneriffe Islands, the home of the Bermuda Onion. No onion grown compares with the Bermuda.

PRICES on above: Pkt. 10c, oz. 25c, $\frac{1}{4}$ lb. 90c, lb. \$3.25, postpaid.

Crystal White Wax Bermuda: The most attractive Onion in the world. It is an absolutely pure white Bermuda with a most beautiful waxy appearance, which makes it sell on sight in all markets. Except in color it is identical with the yellow Bermuda. The bulbs grow to the size of saucers and larger, and are mild and sweet and are especially suited for the home garden. This is the mildest and earliest of all onions. This seed is also imported from the Teneriffe Islands.

PRICES on above: Pkt. 10c, oz. 40c $\frac{1}{4}$ lb. \$1.50, lb. \$6.50, postpaid.

American Wonder: An exceedingly dwarf variety, only eight to ten inches high, and is a few days later than Alaska. The small pods are straight with six to eight large peas. A good yielder. Wrinkled variety.

First & Best: An extra early, very productive variety. The pods are short but well filled. The vines are from twenty-four to thirty inches high.

Gradus: Also called Prosperity. It is the best early wrinkled pea in existence. The vines grow three feet high, bearing large pods from four to five inches in length.

Laxtonian: This is one of the finest dwarf early peas offered today. The vines grow eighteen to twenty inches high and produce an enormous crop of dark green pods as large as Gradus, maturing a few days earlier than that variety.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Little Marvel: The vines average fifteen inches in height and are heavily set with fine pods, frequently borne in pairs. The pods are two and one-half inches in length and are square at the ends, well filled with six to seven large deep green peas.

Notts Excelsior: This is a fine dwarf variety, with pods larger than American Wonder and maturing almost as early. The pods are closely filled and packed so that the peas are flattened against each other at the sides. Excellent variety for home or market.

Premium Gem: Of dwarf growth maturing early. The vines are twelve to fifteen inches high and very productive. Pods are long, round and well filled with sweet and delicious peas. Noted for its heavy yield.

Thomas Laxton: This is a real rival of the Gradus as a long podded, extremely early wrinkled pea and in some respects is even better. The pods mature about four days later than Gradus. The growth is identical, but the pods are a richer green than the Gradus.

Bliss Everbearing: The pods are broad and borne at the top of the vine. The Peas are large and of excellent flavor; height of bushes, about two and one-half feet.

Champion of England: The strong growing and much branched vines measure four to five feet high, and they bear an immense crop of pods. The pods are borne in pairs and the peas are crowded in the pods. They are very sweet and delicious.

Stratagem: Sometimes called Potlatch: A main crop Pea growing about two feet high. The pods are borne in profusion and filled with seven to nine large peas. They are very sweet and delicious. A fine late variety of dwarf growth.

Telephone: A strong and sturdy variety growing four to five feet tall. The vines are very productive and the pods are filled to capacity with large peas of delicious flavor.

Early Alaska: Also called "Earliest of all." The vines grow from twenty to thirty inches high, bearing well filled medium sized pods. Matures practically the entire crop at one time. Most popular for canning and early market.

Sutton's Excelsior: The bushes grow from fifteen to twenty inches high and are very prolific. The pods are three inches long, broad, straight and filled to the point. A medium early variety.

Black Eye Marrowfat: The vines grow about five feet high and are very strong. The pods are three inches long, nearly round and blunt ended, containing seven large peas. The vines are very productive.

White Marrowfat: Almost identical with Black Eye Marrowfat except little later maturing.

PRICES on above: Small pkt. 5c, large pkt. 10c, ½lb. 20c, lb. 35c, 2 lbs. 65c, postpaid.

Free Flower Seed With Every Seed Order.

BERMUDA ONION PLANTS

Some of our customers would rather buy the Bermuda Plants, than to plant the seed. In order to care for them, we have established a growing station in South Texas, where all our Bermuda Plants are grown.

Order your plants from us here at Sherman and we will then forward your order to our station to be filled. This takes a little longer for the plants to reach you, and we would suggest you wait at least ten days after ordering before you write us about the order.

Sometimes plants are lost in the mails and we will be glad to locate them for you or replace them.

Buy your plants from us and you will be sure of getting your plants as we guarantee arrival and satisfaction or your money will be refunded.

PARSLEY

Extra Curled Dwarf or Emerald: The moss like leaves, of handsome bright green color, are finely curled. For garnishing, Emerald has no superior. A strong grower.

PRICES on above: Large pkt. 10c, oz. 15c, ½ lb. 45c, lb. 75c postpaid.

PARSNIP

Long Smooth Hollow Crown: The roots are long and tapering, requiring a deeply worked soil to develop to perfection. The flesh is tender and sweet.

PRICES on above: Large pkt. 10c, oz. 15c, ½ lb. 45c, lb 75c postpaid.

PEPPERS

Chinese Giant: Makes a vigorous growth developing into heavy and stubby bushes about two feet high. They are well branched and thickly set with enor-

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

mous fruits. Before the fruits ripen they are a rich dark green, turning to a bright and brilliant scarlet-red when they reach maturity. The flesh is the thickest ever found in any large sized peppers, being strictly mild and sweet.

PRICES on above: Pkt. 10c, $\frac{1}{2}$ oz. 25c, oz. 40c, $\frac{1}{4}$ lb. \$1.50, lb. \$5.50 postpaid.

Bullnose, or Improved Large Bell: This standard variety grows two feet in height. The fruits are produced in great profusion, and ripen early. The fruits are rich scarlet, three inches in length and two inches in diameter. Occasionally a plant will produce hot fruits, but usually they are sweet and mild.

PRICES on above: Large pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 80c, lb. \$2.75 postpaid.

Ruby Giant: This is a cross between the Ruby King and Chinese Giant. The fruits are handsome. They are a brilliant and bright shining scarlet. The skin is smooth and evenly colored. Very prolific and early. The flesh is thick, sweet and always mild.

PRICES on above: Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. \$1.00, lb \$3.75 postpaid.

Sweet Mountain: The plants are strong, upright growth, about two feet high. It is an early maturing variety. The fruits are of good size and ripen early and evenly. It is a productive variety bearing fruits all during the season.

PRICES on above: Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. \$1.00, lb. \$3.75 postpaid.

Ruby King: The bushes are about two feet high. The fruits measure from six to eight inches long by four inches in diameter. The skin is glossy and a bright ruby-red. The shape of the fruits is blocky, tapering toward the blossom end. They are mild and very pleasant in flavor. The flesh is unusually thick for such a large fruit, and so sweet that it may be eaten like an apple. It matures reasonably early and bears an immense crop of fruits.

PRICES on above: Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. \$1.00, lb. \$3.75 postpaid.

Long Red Cayenne: This is the true Cayenne Pepper. The fruits are narrow, about one-fourth inch thick and three inches long. They are borne in great abundance, and very hot in flavor.

PRICES on above: Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. \$1.00, lb. \$3.75 postpaid.

PUMPKINS

Large Cheese: Large round flattened fruits, with creamy buff skin averaging two feet in diameter. It has thick flesh of extra fine quality and will keep well all winter long.

Connecticut Field: Planted mostly in Corn for stock feeding and making pies. Fruits rather long, smooth, hard and reddish orange. Flesh orange yellow.

Free Flower Seed With Every Seed Order.

Kentucky Field: Famous old time pumpkin, strong, vigorous grower and very productive.

PRICES on above: Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c postpaid.

Tennessee Sweet Potato: Pear shaped and a little ribbed; color creamy white, sometimes striped with green. Very hardy, productive and keeps till late spring. Looks like a sweet potato when cooked.

Japanese Pie: Distinct Japanese variety adapted to all parts of the South. Very meaty and solid, looks like a Cashaw but matures earlier and is usually larger. Meat free from water and easily cut and dried.

Green Striped Cashaw: The fruits are of the typical crookneck shape, with a thick heavy neck, containing a good amount of flesh. The skin is creamy white, striped and mottled with green bands. The flesh is rich yellow color, tender and of finest flavor.

PRICES on above: Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. 95c postpaid.

French Breakfast: Oblong or olive shape. The color of skin is bright carmine, shading to clear white in the lower portion. The flesh is white, crisp and firm. One of the leading varieties for early market or home use.

Sparkler, White Tip: Small round roots with bright scarlet top and a clear white base and small, slender tap root. The juicy flesh is pure white and has an agreeable flavor. Grown largely by market gardeners who grow for an early and choice market. It has short tops and makes a quick growth. They are better when eaten before they are fully mature.

Scarlet Globe: Medium sized round roots, with a tendency to grow oval as they increase in size. They are ready for the table in four or five weeks from outdoor sowing. The brilliantly colored skin gives them an attractive appearance. A standard market variety and a favorite among home gardeners. Should be planted in well prepared rich soil.

Early Long Scarlet Short Top: This is a favorite among those who prefer long red Radishes. The roots mature in four to five weeks and they measure six inches in length. The flesh is crispy and juicy. They grow to perfection in well prepared, deeply worked soil.

Free Flower Seed With Every Seed Order.

White Icicle: It is the finest of all long Radishes and is claimed to be the finest Radish grown. The roots are tender and crisp, when fully mature. This Radish is not only delicious but attractive as well. The roots grow to good size and are typical icicle shape. They are straight and free from any side roots. Washed and bunched they will outsell any other Radish.

Crimson Giant Globe: An attractive Red Radish growing quickly to large size. It is especially fine for bunching, being ready for market four to five weeks after the seed is sown. The Radish is deep globe in form and the skin is a deep crimson. The flesh is pure white, crisp and mild in flavor. A fine market or home variety.

Cincinnati Market, or Glass Radish: The roots are a bright pink with white tips, very regular and uniform in size. The flesh is transparent giving it the name glass, always crisp and brittle and the flavor is mild. A market and home variety.

Scarlet Turnip: An extra early round red Radish, of mild flavor, crisp and very tender. The tops are small and when bunched this Radish makes a fine appearance. A popular variety.

Scarlet Turnip White Tip: A favorite among market gardeners. It is ready for market in about three weeks after the seed is sown. The roots are round and red with a white shading at the tip. Very crisp, tender, and juicy. The flavor is mild and does not become pithy until very old.

PRICES on above: Large pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 90c postpaid.

SALSIFY OR OYSTER PLANT

Mammoth Sandwich Island: Easily the best variety. It is a strong grower, with long smooth, white tapering roots, excellent in quality. Desirable for home or market use. Leave in the ground until frost and cook the roots like you would oysters.

PRICES on above; Large pkt. 10c, oz. 15c, ¼ lb. 50c, lb. \$1.75 postpaid.

SPINACH

Prickly Winter: This is a very desirable variety for fall sowing and will live through the winter if protected with a light mulch of straw. For home or market.

Bloomsdale Savoy Leaved: The numerous leaves are curled and wrinkled. A very fine and productive variety. Market gardeners' favorite.

New Zealand: Called the hot weather Spinach. Started early in the Spring, the plants will resist heat and make a fine growth during the summer. The plants are taller than other Spinach, with small and thick leaves. If the young shoots are kept picked the plant will continue to bear through the summer

Free Flower Seed With Every Seed Order.

and fall. Experts report the leaves are richer than other Spinach.

PRICES on above; Large pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c postpaid.

SQUASH

Giant Summer Crookneck: Of true bush growth, very early and productive. The skin is a beautiful deep orange and the flesh a rich shade of salmon orange. The fruits are meaty and of delicious flavor.

Early White Bush: This is the White Patty Pan of true bush growth and very early. The fruits are flattened, round and scalloped. The color is creamy white. Very delicious.

Boston Marrow: A large fruited, hard-shelled sort for winter use, having bright orange skin and deep orange flesh, vines of strong running growth, very productive broad oval fruits.

Hubbard: A well known winter squash. Now grown so largely throughout the country. The fruits are large, olive shaped, with a point at the blossom end, and a short neck. Dark green skin and very rich flesh. An excellent keeper and splendid quality.

PRICES on above: Large pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. 90c postpaid.

TOMATOES

Spark Earliana: The Tomatoes are quite uniform in size, averaging three inches in diameter and from two to two and one-half inches in depth.

They are fleshy, solid and excellent for shipping purposes. Early and scarlet color.

Chalk's Early Jewel: The largest, smoothest and finest flavored, extra early, bright red tomato on the market. Without a doubt the best home garden variety. The bright scarlet fruits are smoothly round, very deep and solidly meaty, with only a few quite small seed cells and are of remarkably fine sweet flavor.

June Pink: A large and distinctly pink fruited variety of spreading growth. The fruits usually weigh from five to six ounces and are flattened and are slightly ribbed. The purplish red flesh is solid, of fine texture and slightly acid.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Stone: A late or main crop variety, making a heavy growth and yielding a good crop. Large, smooth, solid fruits of a deep scarlet color. This variety is being slowly abandoned for the matchless variety.

Dwarf Stone: The plants are strong and vigorous, of typical dwarf growth. The fruits are borne in clusters of three to five, each plant producing a large number. The fruits are bright scarlet, very smooth, firm, solid and all flesh. They average four inches in diameter by two and one-half inches deep.

Livingston Globe: The plants are vigorous, making a large spreading and slightly upright growth. The fruits are medium size, weighing about five ounces. They are borne most freely and are very even in size. The true globe shaped fruits are fine purple-red and attractive. The flesh is solid and the seed cavities small. Extensively planted by Southern truckers for early shipment to the North.

Early Acme: This is an old standard variety making a spreading growth. The fruits are borne in clusters of three to five. The skin is purple-red, and the flesh a dark red, fine in texture and slightly acid.

Matchless: The best large fruited main crop tomato on the market. A strong grower with thrifty vines. The foliage is thick and protects the tomatoes from sun scalding. The fruits are of the largest size, cardinal red and perfectly smooth. They are firm and solid and noted for their long keeping qualities. They are meaty and the flavor is agreeable and tasty. They are also free from any core. A very popular variety.

John Baer: A fine flavored bright red tomato on the order of Chalks Early Jewel. The fruits are large, smooth and sweet. A heavy yielder.

Livingston Beauty: A main crop variety. Fruits are glossy, round and smooth. The flesh is solid, sweet and a purplish color.

Dwarf Champion: The stalks are stiff, upright and of compact growth. The fruits are medium size, purplish pink color, regular in size and shape and very smooth. This is a second early variety.

McGee: This tomato was originated in Texas and our customers report it makes where others fail. A large yielder and very prolific. The fruits are large, solid with very few seeds and of fine flavor. In our opinion a fine variety.

Red Rock: This is a fine large late red tomato. Matures in from 110 to 115 days and is fine for canning or nearby markets. The meat is very solid, hence the name Red Rock. There is practically no waste tomatoes in a crop of Red Rock. Plant a crop of Red Rock this year. You will like them.

PRICES on above: Large pkt. 10c, oz. 20c, ¼ lb. 80c, lb. \$2.90 postpaid.

Ponderosa: This is a tomato of immense size, with solid meat and practically free of seeds. The fruits

Free Flower Seed With Every Seed Order.

are handsome, large, smooth and have a rich dark crimson color. The plants bear an immense crop of tomatoes and are large in size. Some individual tomatoes weigh as much as one and one-half pounds each. Sometimes known as the Beef steak tomato. Planted for home and market.

Yellow Pear: This is an attractive small fruited tomato of typical pear shape. Enormously productive and the fruits make excellent salad. They are sweet and delicious.

Golden Queen: Yellow fruited tomato and has an excellent flavor. This is a standard main crop variety bearing a large crop of smooth, flattened, pure yellow fruits of medium size.

PRICES on above: Large pkt. 10c, oz. 40c, $\frac{1}{4}$ lb. \$1.25, lb. \$4.25 Postpaid.

Red Head-(New): This is a new variety and from reports is a fine tomato. The fruits are a bright red, smooth and the finest flavored tomato on the market. It is a tremendous cropper and bears through out the season. Without question the best home garden variety. The bright scarlet fruits are smoothly round, very deep and meaty, with only a few quite small seed cells and are of remarkably fine sweet flavor. Our seed is selected, and the best.

PRICES on above: Large Pkt. 15c, oz. 50c, $\frac{1}{4}$ lb. \$1.50, lb. \$4.75 Postpaid.

TURNIP

Extra Early Purple Top Milan: The bulbs are flat of medium size, smooth with a crisp white flesh of excellent flavor. The upper portion of the bulb is a bright purple, the lower half pure white. Well adapted for early forcing.

PRICES on above: Large Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 25c, lb. 90c.

Early Red, or Purple Top Strap Leaf: The roots are flat with a purple upper and the lower half is a milky white. The roots grow quickly and are uniform in size, shape and coloring. The flesh is fine grained, tender and sweet.

Large Yellow or Amber Globe: The roots are almost round and slightly oval in outline. They are smooth and have a single tap root, free from side roots. The skin is a pale amber. The flesh is a creamy yellow and very attractive. It is sweet, tender and fine grained. Sweet and delicious.

Purple Top White Globe: Also known as Red Top White Globe. The roots measure six inches in diameter, being a perfect globe form. The upper portion is a rich purplish red and the lower half a creamy white. Flesh white, firm and crisp; of mild flavor.

Free Flower Seed With Every Seed Order.

Golden Ball or Orange Jelly: Perfectly globe shaped roots with rich orange colored skin, smooth and regular. The flesh is one of a pale amber tint, firm and fine grained. Sweet and delicious.

White Egg Turnip: One of the most popular for fall and winter use. The roots are of a neat globe shape with an almost white, smooth skin. The flesh is fine grained and free from fiber. It is crisp and tender. The flavor is sweet.

Purple Top Yellow Ruta Baga: This is a winter turnip which produces uniform smooth, globe shaped roots with a purplish color on top, and deep yellow below the soil. The flesh is rich yellow, sweet and free from fiber. Easily stored for winter use.

Early White Flat Dutch: Medium size and a quick grower. It is flat with a small tap root. Flesh pure white, fine grained and sweet. Especially fine for a quick grower in spring or fall.

Long White or Cowhorn: Roots long and carrot shaped. The roots have a greenish cast on the upper portion. The flesh is pure white, fine grained, sweet and of excellent table quality.

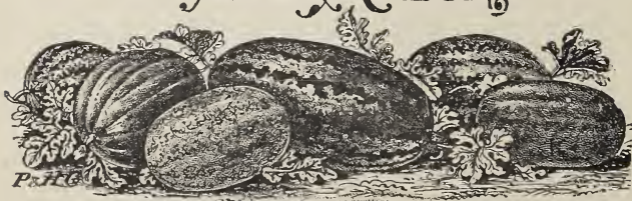

Pomeranian White Globe: One of the largest and most productive of all turnips. Roots weigh from eight to ten pounds. They are globe shaped, white and smooth. Especially fine for stock feeding when fully mature.

PRICES on above: Large Pkt. 10c, oz. 15c, ¼ lb. 20c, lb. 75c Postpaid.

Seven Top: Does not produce any edible roots. It is grown for the fine greens it produces. The leaves are large, extremely tender and borne freely. They are considered the finest greens in existence today.

PRICES on above: Large Pkt. 10c, oz. 15c, ¼ lb. 50c, lb. \$1.25 Postpaid.

❖ WATERMELON ❖

Wonder Melon: Sometimes called Reuter's Wonder. The great big, sweet, juicy Watermelon. Just imagine the most delicious watermelon you ever tasted. Then you have an idea how the Wonder Melon tastes. It is the sweetest Melon we have ever tasted and our customers report the same. If this Melon doesn't make your mouth water, there's some-

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

thing wrong. No other Melon has ever attained such popularity for home and nearby market use. It is a perfect Melon for that use. Vines strong and vigorous, Melons medium to large size, 18 to 24 inches long, ten to twelve inches through. Skin a very rich dark green color, flesh extra sweet and of brightest rich scarlet, ripening right up to the rind; medium early. Plant some of this seed and enjoy the best melons you ever tasted.

PRICES on above: Large Pkt. 10c, oz. 15c, ¼ lb. 50c, lb. \$1.25 Postpaid.

Halbert Honey: The Fruits are long and blunt at both ends, entirely free from any neck. The skin is a deep glossy green and the flesh a beautiful crimson. This is a fine home garden variety. The flesh is sweet. Medium early.

Tom Watson: A tough rind shipping melon, superior to any other of its class. The melons measure 18 to 20 inches long by ten to twelve inches through, and weigh from fifty to sixty pounds. The dark green rind is tough but thin. The deep flesh extends to three-fourths inch of the rind. A medium sweet melon; flesh crimson.

Kleckley Sweet: The fruits are very attractive. oblong in form, and have a glossy green skin. The rind is very thin and for that reason can not be shipped. The melons average 18 to 20 inches long, by ten to twelve inches through. The flesh is a bright scarlet and very sweet.

Augusta, or Georgia Rattlesnake: The fruits are large and oblong in form. This skin is mottled and striped with various shades of green. The quality and flavor is excellent. The flesh is a deep scarlet and sweet.

Excel: Largest of shipping Melons, of good quality with solid firm flesh. Skin is green with bands of of darker shade. Flesh is a deep scarlet and sweet.

Alabama Sweet, or Carolina Bradford: An excellent shipping Melon for Texas. The rind is dark green, marked with a darker shade stripe. The flesh is a bright red, fine grained and very sweet. The rind is thin but tough, making it a first class shipper.

Golden Honey, or Golden Sweet: The rind is a dark green with a bright golden yellow flesh. The firm meat is luscious and sugary. The Melons average twenty pounds and unquestionably the best in its class.

Angel Kiss: A Texas variety. Of oblong shape with bright red flesh, very solid and firm. The quality is excellent. Rind mottled silver-gray, very tough and thin.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Means Delicious: Another Texas Variety. of oblong shape and large size. Color light green with darker neeting. The flesh is a crimson color, solid and very delicious.

Irish Grey: This is a combination Melon, for home or shipping. Equally as good if not better than the Watson. The flesh is crisp, red and very sweet. It is free from stringiness. The rind is a mottled gray-green, thin and tough. Vines vigorous, healthy and hold up well, producing Melons for late summer use. Plant some of these seed. You will be delighted with the Melons

PRICES on above: Large Pkt. 10c, oz. 15c, ¼ lb. 25c, lb. 75c, 10 lbs. \$6.00 Postpaid.

FIELD SEED SECTION

All prices are subject to change without notice and FOB Sherman , unless otherwise specified.

ALFALFA

More Alfalfa should be planted by the Southern farmers, as it is said a ton of Alfalfa hay has the same feeding value of a ton of shelled Corn. Alfalfa in the South will produce from three to seven tons of hay per acre and enriches the soil as well. If you have not seeded your land in Alfalfa before, be sure to inoculate your seed with Mulford Culture or Nitragin before planting. Do not buy cheap seeds; if the price is cheap, it is not pure and you will get a mixture of weeds that may destroy your crop. Cheap seed are high at any price. Buy the best. All our Alfalfa seed is re-cleaned and the purity is over 99 per cent. Seed twenty pounds to the acre.

SEED CORN

Seed Corn this season is very scarce. The Texas crop was practically a failure and we had to spend a lot of time in securing our seed. This seed is all selected stock, hand shelled and nubbed in our modern seed corn plant. After shelling, this corn is run over our seed corn grader and all the small grains taken out. We lose from 50 per cent to 60 per cent Corn in preparing our seed. You cannot buy better at any price. Cheap seed is high at any price. Buy from reliable parties.

Free Flower Seed With Every Seed Order.

COTTON SEED

(For planting)

The high price of Cotton this year has caused the Southern farmer to plant more. Be sure to buy seed that will give you the largest returns on your investment. Don't buy cheap gin-run or oil mill seed. Some unscrupulous dealers are selling this seed at a cheap price. This grade of seed is high at any price. Our seed is grown under our supervision and favorable conditions. Plant it this year and make more money on less land.

Our Mebane, Lone Star and Truitt cotton seed is grown on contract here at Sherman under our supervision. This seed is ginned, culled, sacked and shipped by us. For that reason we know what we ship you.

All our cotton fields are inspected by our cotton expert and all off-type stalks are pulled out, thus assuring you of a pure strain of cotton seed. This seed is ginned under our supervision to prevent any mix-ups at the gin and hauled from the gin to our warehouse for culling and sacking.

Half & Half: Our Half & Half seed is only one year from the originator. The growers from whom we purchased this seed paid \$5.00 per bushel last year for them. The Cotton was ginned on a gin that did not gin anything except Half & Half. For this reason we think we have the best seed in Texas. This seed lints from 45 to 48 percent with a staple of about one inch. The bolls are medium sized and the field turn out is good.

Boykin: This seed grown from elite seed purchased from the originator. This seed was ginned separately and is pure. This cotton made some of the largest yields in Grayson County this year. The bolls are large, storm-proof, easy to pick and early. Lints from 38 to 43 percent staple 1 1-16 strong.

Ferguson 406 Triumph: Handled the same way as the Boykin. This is an early, big boll, storm-proof variety. Lints from 38 to 45 percent, with a staple of from 1 1-16 to 1 1-8 inches. Strong staple.

Mebane: We purchased our Mebane seed last year direct from the Mebane Company at Lockhart, Texas. We issued this seed to our growers to be grown and delivered to us this fall. After our fields have been rogued we have as pure a strain of Mebane as can be purchased from any one. This seed gives from 38 to 42 per cent lint turn out at the gin. Staple from 1 1-16 to 1 1-8 inches with a strong body.

Lone Star: This seed is handled in the same manner as our Mebane. Lint turn out of from 36 per cent to 40 per cent at the gin with extra strong staple. This is the best quality of lint of any big boll variety grown in the Southwest. Staple 1 1-16 to 1 1-4 inches.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Truitt: This seed was purchased direct from Truitt's breeding blocks and issued to our growers. Handled carefully and in the same manner as our other seed. Lint turn out from 39 per cent to 42 per cent at the gin. Staple 1 1-16 to 1 1-8 inches with strong body. This cotton especially desirable as the long tap root carries it through extra dry seasons.

Big Boll Rowden: This seed is not grown by us, but purchased from reliable shippers. We have always bought our Rowden seed at Wills Point, Texas, which is the Rowden center. Lint turn out from 36 per cent to 38 per cent at the gin. Staple 1 1-16 to 1 1-4 inches with extra strong staple.

Kasch Strain: This seed grown from seed purchased direct from Mr. Kasch last year. Early, large bolls, large field yield and lints from 38 per cent to 42 per cent, staple 1 1-16 to 1 1-8 inches.

SEED OATS

"Two Square Brand" Texas Red Rust Proof Oats:
This is an improved Texas Red Rust Proof Oat that outyielded all others in Grayson County last year.

These Oats will give you better yields and make you more dollars per acre. Remember, there is not any extra labor cost to get this extra yield.

These Oats are treated with a formaldehyde solution which practically eliminates the Rust and Smut. You will save losses from these two diseases.

We double re-clean these Oats and take out all the small Oats, dust, chaff, and other impurities. This leaves only the large, plump grain for seed.

Early Fulghum Oats: A quick early maturing Oat that matures from ten to fourteen days earlier than the Texas Red Rust Proof Oats. Yields well and the seed is extra heavy.

This Oat is also double re-cleaned and treated with formaldehyde solution to reduce smut and rust.

Free Flower Seed With Every Seed Order.

Sherman Seed Co., Sherman, Texas

Ferguson No. 71 Oats: Some of our customers want these Oats and we purchased three thousand bushels that were grown from pedigreed seed last year. We had to pay a premium above the market to get them and have double re-cleaned and treated them also. They are extra nice and will please you.

Free Flower Seed With Every Seed Order.

A PERSONAL LETTER FROM THE MANAGER

January 2nd, 1925

Dear Customer:

You may think it strange, that a firm of our size, does not send you a large Catalog, full of cuts and pictures of Flowers, Vegetables and Plants. We started to have one printed, instead of this small one, however, after much argument decided against it. This decision, we thought, would be for your benefit.

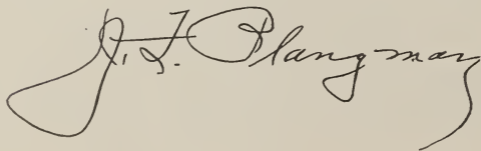

Perhaps you do not know what it would cost us to mail all our customers a large, illustrated catalog. Well, it would cost \$3,500.00, whereas the one we are mailing you only cost \$1,250.00. This means an actual saving to our customers on our catalog alone of \$2,250.00. We are giving our customers the benefit of this saving, by selling them *QUALITY* seeds at a cheaper price than most *Reliable Seedsmen* are asking for the same seed. This is only one of the savings we are making, to sell our customers *BETTER* seeds for *LESS* money.

We have decided to let our customers decide the Catalog question for next year. Do you want a large, illustrated catalog or another small one? The majority will rule, so be sure and send us your decision on this question. We are here to serve you, and want you to tell us your wants. Don't forget to vote on this important question, for we will not know your wants, unless you tell us.

Wishing you the best of success during the coming years, we remain,

Yours for better seeds,

SHERMAN SEED COMPANY
